PROFILE

Entry-level IT Support candidate with hands-on experience in a Windows Server lab using VMware. Practical knowledge of Active Directory, DNS, DHCP, Group Policy, user account management, and file sharing, familiar with basic network troubleshooting and managing user access permissions, seeking an IT Support or Help Desk role to apply my technical skills and develop my professional experience

EDUCATION

2023 at Bachelor of Management Information Systems, Mansoura, Egypt October 2019 - June 2023

Grade: Good

Bachelor's degree in Management Information Systems from Delta Higher Institute for Computers and Information Systems. Gained strong skills in computer applications, data organization, and effective communication, with a focus on practical application in customer service and office work.

- Graduation Project: Online Banking Website

SKILLS

IT Support & Troubleshooting: Familiar with basic hardware and software troubleshooting, identifying common technical issues, and following a systematic approach to problem-solving

Windows Server & Active Directory: Hands-on lab experience with Active Directory, domain user and computer management, organizational units, security groups and Group Policy

Networking Fundamentals: Practical knowledge of TCP/IP, IPv4 addressing, subnetting, DNS, DHCP, VLANs, routing fundamentals and network troubleshooting using Cisco Packet Tracer

File Sharing & Access Permissions: Practical lab experience configuring shared folders, managing access permissions, applying storage quotas, and testing file-screening policies using Windows Server tools

Front-End Development: Previous self-directed learning in HTML, CSS, Tailwind CSS, Bootstrap, JavaScript and React.js providing a foundation in web technologies and application troubleshooting

PROJECTS

Windows Server Administration & Active Directory

Built and configured a Windows Server lab using VMware Workstation to simulate a small company IT environment.

- Installed and configured Active Directory Domain Services, DNS, and DHCP
- Created domain users, organizational units, and security groups
- Configured and applied Group Policies for USB restrictions and account lockout
- Managed shared folders and departmental access permissions
- Configured storage quotas and file screening using FSRM
- Assigned local administrator permissions to IT security groups
- Tested configurations and performed basic domain and network troubleshooting
